

Structure in Action Workshop

with Pat Hastings at Blue Springs 'N Katydid

Full day Saturday and half day Sunday, October 6th & 7th 2018

Join us with **Pat Hastings** as she combines her Puppy Puzzle presentation with her discussion on the value of structurally evaluating adult dogs that are being considered for a breeding program, working trials or performance competition, along with a canine physical therapist's perspective on how to reduce risk of structural injuries in working and performance dogs on Saturday. On Sunday the day will be spent applying all of the information discussed in the seminar evaluating attendees' puppies and adult dogs.

Dogs will do most anything we ask of them, so our goal is to make sure that we don't ask them to do something they're structurally incapable of doing without breaking down. The more we learn about canine structure, the more we understand what is reasonable to ask of our dogs when considering their strengths and weaknesses.

Pat Hastings is well respected in the dog world as an educator, author, and AKC judge. She is well-known for her Puppy Puzzle video, as well as many published works. She also evaluates the structural quality of over 300 litters per year. Pat has been involved in the dog world since 1959. She began her career as an owner/handler, moving into breeding, then teaming up with her husband in professional handling. Visit her website www.dogfolk.com for more information!
